

# PANSY

**Botanical Name** *Viola x wittrockiana*

**Ethylene Sensitivity** No

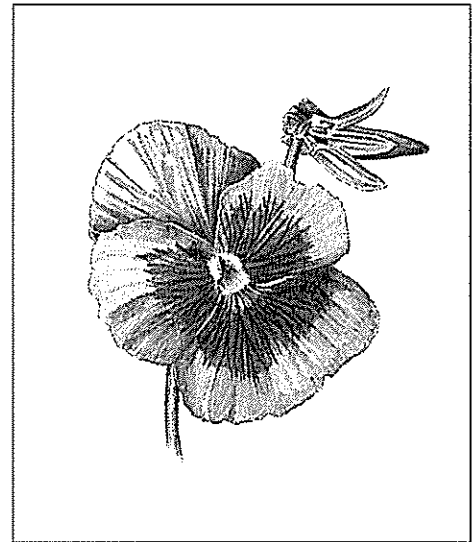

**Storage Temperature** 35-40°F

**Storage Time** 3 days

**Purchasing Hints** Select plants with numerous buds present and several open flowers. Root system should be well developed.

**Special Concerns** Pansy performs best when displayed and grown under cool conditions. Warm conditions reduce flower development and cause fading of flowers.

**Additional Information** Plants should be budded at time of sale. Display in high light and cool temperatures. Customers should be encouraged to use a pre-plant fertilizer application to optimize garden performance.

*The "x" in the name indicates that this is an interspecific hybrid, most likely among *V. altaica*, *V. lutea*, and *V. tricolor*.*
